

Our Vision

Together, we will undertake the largest campaign in Northumberland County's history, the **Exceptional Community, Exceptional Care** campaign. We will fund three crucial areas, which will put NHH at the forefront of modern healthcare.

1

Provide Faster, Smarter, Safer Care

To keep pace with advances in diagnostic imaging technology, we will purchase both a new Magnetic Resonance Imaging (MRI) and Computed Tomography (CT) scanner. This investment will:

- Result in more precise, timely diagnoses
- Reduce the average scan time per patient, allowing for more efficiency and a greater capacity to perform tests
- Provide enhanced diagnostic capabilities with higher resolution allowing for better visualization of the area(s) being imaged

2

Transform the Patient, Caregiver, and Provider Experience

NHH will put patients first by introducing a new integrated clinical information system that will fundamentally change the delivery of healthcare— a joint undertaking linking seven area hospital corporations. This investment will:

- Improve patient safety by ensuring quick access to an accurate medical history
- Decrease potential for adverse drug events or medication errors
- Reduce repetition of information for patients visiting multiple departments and/or hospitals
- Use better data to support accurate diagnosis, recommended treatment, and patient education
- Improve communications with and between clinicians
- Reduce duplication of both imaging and tests

3

Replace Life-Saving Equipment and Prepare for Growth

Every year, we invest in medical equipment and technology that is pivotal in ensuring we can continue to offer the best care possible to our community. Over the campaign duration, these investments will continue to be required and will remain a priority. This investment will:

- Support the purchase of priority medical equipment necessary to meet increasing demand and continuously improve care
- Continue to fund critical medical equipment required each year (i.e. surgical scopes, hospital beds, IV poles, and more)
- Enhance patient and staff safety
- Allow NHH to invest in new and improved technology to benefit patient care in all departments throughout the hospital

By investing in these priorities we will ensure we can continue to attract and retain talented physicians and clinical professionals to our community, and keep high-quality, best-in-class healthcare close to home
