

PALLIATIVE CARE

ARE YOU AWARE THE GOVERNMENT DOES NOT FUND CAPITAL EQUIPMENT FOR COMMUNITY HOSPITALS?

Donations received by the NHH Foundation help us to provide the best medical equipment possible.

CURRENT PRIORITY: 2 STRYKER ISOFLEX LOW AIR LOSS MATTRESSES AT A COST OF \$3,735 EACH

We are hoping to purchase 2 specialized Isoflex Low Air Loss Mattresses for the Palliative Care Unit at a cost of \$3,735 each. These mattresses have a gel therapeutic support surface that helps re-distribute pressure by buckling and absorbing the patient's weight to provide much needed comfort.

Compared to other standard mattresses used in hospital beds, these mattresses make a significant difference to the way our end-of-life patients experience their remaining days.

Recognizing life is precious - from the beginning to the end -- our goal is to ensure patients have access to the best medical equipment possible, close to home.
